

**Nice Price series –
top quality**

Field-proven carat
and gold scales from
Sartorius

Nice Price series – no tolerances in weighing gold and gemstones

Top quality – proven Sartorius value for your money. Being able to trust the accuracy of weight readouts is still the measure of all things, even in the Nice Price range. The name Sartorius stands for the highest level of reliability for weighing accuracy – without any compromises.

In this price range, you have a choice of ten models with compact housings. With all the performance features that you need in your business and you've come to expect from Sartorius. Options include scales that are verifiable for use in legal metrology within the EU and their Signatory States, and OIML Certificates of Conformity for R76-1.

Low space requirements

The compact housing dimensions and the light weight of the scale itself enable you to be flexible in setting it up. As a result, the scale offers ideal portability, especially for battery operation.

Fast results

The response time of the scale is so fast that when you load a sample, the stable readout appears nearly simultaneously.

Easy to read

The black-and-white liquid crystal display shows readouts with big, bold and bright digits – in grams, carats, troy ounces, taels or pennyweights. Plus, the display control panel makes operation exceptionally easy.

Battery-operable as an option

If you are on the move and need to work independently of an AC outlet, you can use a commercially available 9-volt battery in some of our models. All other models are battery-operable when connected to an external rechargeable battery pack.

Logging capability for weighing data

The standard RS-232C serial port allows you to connect a Sartorius data printer to the scale or use the SartoConnect data transfer software to transmit data to a PC. This means you can log all weighing results quickly and reliably, and conveniently recall and print them out as proof, at one touch of the print key.

Fast and reliable counts

Every Sartorius gold & carat scale features a built-in program for counting of the tiniest of parts.

Extensive offer of accessories

A glance at our offer of accessories will show how you can use the capabilities of Sartorius gold and carat scales even more efficiently.

Specifications of the Nice Price series of Sartorius gold and carat scales

Model	GD603-OCE*	GD603	GD252
